## OBJECTIVES OF THE CONGRESS

The main objective of the Congress is to contribute to the improvement of hydraulics and pneumatics technologies.

**The Congress also provides an opportunity to;**

discuss scientific and technological developments in the field of hydraulics and pneumatics and their applications.

provide a common platform for hydraulics and pneumatics engineers and technicians, academicians, researchers, developers, users, students, sector and trade associations.

determine the required actions on education, research and legal regulations and share the current developments with the engineers and technical people working on the hydraulics and pneumatics.

It is desired that the papers presented in the Congress is a technical reference for application engineers and technical people.

Hydraulics and Pneumatics Congress with its scientific program, exhibition and social activities will be a common information and sharing platform for the hydraulics and pneumatics sector.

Engineers, academicians, technicians, companies and sector associations who are working in the hydraulics and pneumatics field are invited to contribute and give support to this common platform.
